DETAILED ACTION

Drawings

1. Figure 1a and 1b should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

2. Claims 1-10 are allowed.

3. The following is an examiner's statement of reasons for allowance: Claims 1-10 are allowed because the closest prior art of record fails to disclose a circuit as shown in Figure 4a wherein the circuit includes a sampling circuit (42) for sampling a lower frequency write-enable signal (WE) at opposite edges of the positive edge and the negative edge according to the states (which are output from recording circuit 41), and joining sampling results (this is seen to be done by AND gate 425) respectively sampled from the positive edge and the negative edge to output a synchronized output signal (SWE) in combination with the rest of the limitations of the base claims and any intervening claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
